

Red Supergiant

$\text{♩} = 120$ $\text{♪} = \text{♪}$

by David Haines
28 Feb 2010
Based on Red Giant 1988

Mel

The spec - tral class of a

Mel

star, we hear is down to the i - o - ni - sa - tion of its chro - mo - sphere

Mel

Which - e - ver a - to - mic ex - ci - ta - tions show best Are a

Mel

sure - fire stel - lar clas - si - fi - ca - tion test so....

Mel 14 2

Dif - fract the light from that dis - tant sun Through a

Mel 17 3

gra - ting there-by ma - king here on Earth a spe - ctrum(mm..)

Mel 20

A rain - bow striped with dark ab - sorp - tion lines Each the

Mel 22

sign of an e - le - men - tal i - on - ic kind so....

Mel 26

These lines will tell you clear

Mel 29 3

Which e - le - ments are lur - king here The spe - ci - fic lines for each

Mel 32

e - le - ment show Just how hot that star glows....

Mel 35

40

Mel 44

Take one star far big - ger than our sun

Mel 47
Get-ting ve-ry old, run-ning out of he-li-um In less than a se-³cond the

Mel 50
core im-plodes Bright-ter than a ga-la-xy that star ex-plodes

Mel 53
Red su-per-gi-ant in a black ³sky Might a-ny mo-ment

Mel 56
blow sky ³high Red su-per gi-ant time bomb

Mel 59
Su-per-no-va blow-ing now so Let's be gone When a big star grows

Mel 62 5

ve - ry old It swells up big, gets re - la - tive - ly cold Then at a - ny

Sop 66

Alto

Ten
